Seventeenth Revision

August 1991

Preface

This revision of the Veterinary Services Animal Disease Thesaurus represents a continuing effort to delete unneeded terms, combine similar terms, and substitute or insert single words as they were suggested by coders, indexers, and data bank users.

The rationale of the revision procedure is to preserve the general format, as derived from the 1971 Veterinary Subject Headings of the Commonwealth Agricultural Bureaux (England), and expand the numbers of hierarchical trees, consistent with the 1990 Edition of the Commonwealth Agricultural Bureaux Thesaurus (C.A.B. International, Wallingford, Oxon OX10 8DE, UK).

Virus nomenclature in this issue is consistent with recommendations of the International Committee on Taxonomy of Viruses adopted by the World Health Organization.

The thesaurus was first developed to fill the need for terms with which to index the veterinary literature for rapid retrieval of specific information on animal diseases exotic to the United States. It was later expanded to accommodate the coding of information on brucellosis, tuberculosis, pseudorabies, and other domestic diseases. This edition contains approximately 4,000 coded terms arranged in alphabetical and hierarchical sections.

The Animal Disease Thesaurus is continually revised, enriched, and updated with new concepts and scientific terms. Revisions are printed annually. The user desiring additional information or updated copies of the thesaurus should contact:

Veterinary Services, Animal Disease Management Information Center
Emergency Programs, Operational Support, Animal and Plant Health Inspection Service,
